DETAILED ACTION***Claim Rejections - 35 USC § 103***

Claims 15-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mandelman in view of Divakaruni and Puchner et al (6,156,620). As stated in the previous action, hereby incorporated by reference, Mandelman and Divakaruni teach the basic structural configuration of the invention including the use of nitride trench liners with NFET and PFET devices. Amended claim 15 now requires that the nitride liner extend into the substrate wall. Puchner also teaches the use of nitride trench liners for use in semiconductor devices, and further uses plasma nitridation to form the liners. As stated by applicant in the remarks, this particular process inherently produces nitride liners that penetrate into the semiconductor substrate, as claimed.

One skilled in the art would be motivated to combine these references in order to achieve a superior device isolation with the nitride liner taught by Puchner.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
